

## Illusion of Control

Illusion of Control is a collaborative project involving audio-visual artist/film-maker Brian Cullen (SARC, Belfast), Uilleann piper Ivan Goff, (New York), composer/digital artist Pedro Rebelo (SARC, Belfast), and saxophonist/improviser Franziska Schroeder (SARC, Belfast).

This project investigates the interaction of sounds, narrative, and visible/physical forms in real and virtual environments and explores the musical territory situated between contemporary music and Irish Traditional music practice. The outcome is an audio-visual performance with live music, developed collaboratively between the composer, the film-maker and the two musicians.

The work was commissioned by Franziska Schroeder with the aid of an Arts Council Northern Ireland Grant.
